WEDNESDAY

Chess

2:30pm | Chess4Everyone: This is neither a beginner nor an advanced class; it's both! In this course Kids To Kings welcomes students of all experience levels. Players that are new to Chess will be introduced to The Game of Kings and learn everything from the names of the Chessmen all the way to special moves like Castling. For more experienced players we will go beyond the basics to explore Chess strategy, technique and style! The class will be fun and upbeat and will include gameplay, puzzles, and group activities. And there will be something challenging for all involved. This is truly Chess 4 Everyone!

3:30pm | Scholars Chess*: This class gives students the chance to learn how to speak, read and write Chess. Chess players all over the world use a universal Chess language called Algebraic Chess Notation to record their games so they may discuss and review them later to learn from losses and victories. By the end of this class students will be proficient in this Notation which will enhance their study of the game. Chess Notation also reinforces many other important subjects and areas of study such as reading, writing, math, and even graphs!

*All students should be confident in the basic rules of Chess. This is a perfect follow up class for any children who previously attended Beginners Chess and/or Chess 2.0

3:30pm | Wizards Chess:** The title "Wizards Chess" is borrowed from the first Harry Potter movie in which the young heroes of the film play a larger than life game of Chess where they "become" the chess pieces and use Algebraic Chess Notation to command their side of the board to victory. In this class we'll get creative by deciding which piece to play and practice standing perfectly still like a Chess statue before coming to life and moving across the board to seize an enemy piece. The class will culminate in the students playing a life sized game of Wizards Chess in which they get to act out

their pieces' movement, explore exciting and dramatic ways to capture and be captured, and shout out the words that will transform a board game into real life, "Knight to f3!"

**All students should be confident in the basic rules of Chess. This is a perfect follow up class for any children who previously attended Beginners Chess, Chess 2.0, and especially Scholars Chess.
